

Community Advisory Panel Minutes

Date: Thursday January 18, 2018

Time: 9 a.m.

Place: 215 Cartwright Street, Goodlettsville, TN. 37072

Present: Warren Garrett, Andy Garrett, Paul Davis, Beverly Goodwin, Ashley B. Morris, Rose Baker, Greg Edrington.

We thank you all very much for your contribution to our meeting event as well as our communities!

Discussion:

1. Overview of the supplemental spreadsheet designed to outline our annual report and provide target audience as well as measurable results. Great discussion and suggestions made towards improving data entry. Please continue to email back any suggestions and I will implement them. I am going to add the title "Target Audiences & Measurable Goals" to the top of page under City of Goodlettsville. T.A.B. will also be added under Public Education and Outreach section, however, this is the last year of T.A.B.; Rose Baker may help me with numeric accuracy.
2. My motivation is derived from this panels participation, I appreciate all of you for your interest and continued support!
3. Thanks to Ashley B. Morris for his visit and participation! Ashley is from Gallatin and is the National Environmental Sales Director for Waypoint Analytical. We hope you found our meeting insightful and informative. We look forward to seeing you again.
4. N.O.V.'s discussed from last month.
5. Greg Edrington discussed various local engineering projects that are ongoing within the City of Goodlettsville. He also encouraged everyone to walk the greenway through Moss Wright Park and observe the quality bank restoration performed by KCI via Cumberland River Compact. Main Street update, Madison Creek Sewer project and RFQ's for engineering of upcoming Public Works projects.

We hope everyone gained some valuable information from today's meeting, thanks to everyone for the great interaction!

This information will be available on our Mid Tennessee Stormwater Facebook page.

- **Next Meeting:** Thursday, February 15, 2018

(Details on next Agenda)

Adjourned:

10:30 am

Respectfully submitted,

W. Garrett

Stormwater Coordinator/Goodlettsville TN.

Forming Partnerships

Operators of regulated small MS4s are encouraged to utilize partnerships with other governmental entities to fulfill this minimum control measure's requirement. It is generally more cost-effective to use an existing program, or to develop a new regional or state-wide education program, than to have numerous operators developing their own local programs. Operators also are encouraged to seek assistance from non-governmental organizations (e.g., environmental, civic, and industrial organizations), since many already have educational materials and perform outreach activities.
