

Community Advisory Panel Minutes

Date: Thursday August 15, 2019

Time: 9:00 am

Adjourned: 11 am

Place: 105 S. Main Street, Goodlettsville, TN. 37072

Present: Warren Garrett, Beverly Goodwin, Rose Baker, Greg Edrington, Paul Davis.

Community Advisory Panel Minutes:

1. Discussed TDEC Annual MS4 Report 2018/19. Report is submitted and copy on website.
2. Discussed briefly the following projects coming up:
 - a. Allen Farms
 - b. Echo Hills
3. Extensive discussion in regards to Commercial and Residential inspections protocol and how best to serve the city in relation to open communications between city inspectors and site inspectors. I did meet with WQET, after our meeting and did come up with a suggestion, Metro requires through ordinance, that site inspectors notify Metro if three continuous reports reflect noncompliance on any item of checklist. This may be a very good solution since the site inspectors have no enforcement authority for the 7-day window for compliance. This is also why it is so important for the city inspector to thoroughly inspect and review previous twice weekly inspections, to not only concur that the site inspector has noted the deficiency, but to enforce compliance.
4. Discussion that next month we will need to provide data for the 250K tree day to go out on our October Quarterly.
5. Rose surprised everyone with delicious cream cheese and jelly pastries, fresh from the oven! Thank you Rose! 😊
6. Continue to work on Presentation for TNSA Conference, Greg Edrington will also volunteer as a presenter.
7. Greg Edrington briefly discussed ongoing and current CIP projects for Stormwater.

- **Next Meeting:** Thursday, September 19, 2019

Respectfully submitted,

W. Garrett

Stormwater Coordinator/Goodlettsville TN.

Forming Partnerships

Operators of regulated small MS4s are encouraged to utilize partnerships with other governmental entities to fulfill this minimum control measure's requirement. It is generally more cost-effective to use an existing program, or to develop a new regional or state-wide education program, than to have numerous operators developing their own local programs. Operators also are encouraged to seek assistance from non-governmental organizations (e.g., environmental, civic, and industrial organizations), since many already have educational materials and perform outreach activities.
